1. Project Overview

The purpose of this project is to design and document the implementation of a Save for Later feature for an Online Grocery Delivery Platform. The feature enables customers to save products they intend to purchase in the future, improving customer engagement, increasing retention, and reducing cart abandonment. This project includes complete business analysis documentation, functional specifications, user stories, user acceptance testing, process flows, wireframes, SQL analysis, and Power BI reporting.

2. Business Problem

Problems Identified

- BP-01: Customer Retention has fallen down by 12%
- BP-02: Repeat purchases are also dropped by 9%
- BP-03: Cart Abandonment has increased by 18%
- BP-04: No major change in Average Order Value
- BP-05: Customer complaints have also increased

3. Business Objectives

Clearly define the measurable objectives of the project.

ID	Objective	Target
BO-01	Increase Customer Retention	10%
BO-02	Increase Repeat Purchases	5%
BO-03	Reduce Cart Abandonment	12%

BO-04	Reduce Customer Complaints	9%
-------	----------------------------	----

4. Project Scope

In Scope

ID	Requirement
IS-01	Allow customers to save products for future purchase.
IS-02	Display all saved products in a dedicated Save for Later list.
IS-03	Allow customers to remove products from the saved list.
IS-04	Allow customers to move saved products directly to the shopping cart.
IS-05	Synchronize the Save for Later list across customer sessions and devices.

Out of Scope

ID	Item
OOS-01	Product recommendation engine.
OOS-02	AI-based personalized recommendations.
OOS-03	Wishlist sharing with other users.
OOS-04	Social media integration.
OOS-05	Promotional campaign management.

5. Stakeholders

Stakeholder	Role	Responsibility
Product Manager	Project Owner	Defines business objectives and feature priorities.
Business Analyst	Requirements Owner	Gathers, analyses, and documents business and functional requirements.
Development Team	Development	Implements the Save for Later feature.
QA Team	Testing	Validates functionality through testing and UAT.
Customers	End Users	Use the feature and provide feedback on usability.

6. Assumptions

ID	Assumption
A-01	Customers have registered accounts and can log in successfully.
A-02	Product information is maintained in a centralized product catalog.
A-03	Internet connectivity is available during customer interactions.
A-04	Existing shopping cart functionality is operational.
A-05	Customer data is securely stored and accessible during sessions.

7. Constraints

ID	Constraint
C-01	Feature must integrate with the existing e-commerce platform.
C-02	Project is limited to the Save for Later functionality only.
C-03	Development should not impact existing shopping cart operations.
C-04	The feature must comply with existing security and authentication mechanisms.
C-05	Project timeline and resources are limited for this implementation.

8. Risks

ID	Risk	Impact	Mitigation
R-01	Integration issues with existing shopping cart	High	Conduct integration testing before deployment.
R-02	Data synchronization failures	High	Implement validation and synchronization checks.
R-03	Poor user adoption	Medium	Design an intuitive user interface and conduct usability testing.
R-04	Performance issues due to additional database operations	Medium	Optimize database queries and monitor performance.
R-05	Inaccurate product information	Medium	Synchronize data with the latest product catalog before display.

9. Success Metrics

KPI	Current State	Target	Measurement Method
Customer Retention	Baseline	Increase by 10%	Power BI Dashboard & Customer Analytics
Repeat Purchases	Baseline	Increase by 5%	Sales Reports
Cart Abandonment	18%	Reduce by 12%	Conversion Analytics
Customer Complaints	Baseline	Reduce by 9%	Customer Support Reports
Save for Later Adoption	0%	Achieve 30% feature adoption	Product Usage Analytics
