

USER STORIES: Save For Later Feature Implementation

EPIC 1 - Save Product

TITLE	USER STORY	ACCEPTANCE CRITERIA		PRIORITY	ESTIMATION	DESCRIPTION
US-001 – Save Product	<i>As a customer, I want to save products for later so that I can purchase them at a more convenient time.</i>	1	Customer must be logged in before saving a product.	HIGH	5 SP	Allows authenticated customers to save products from the Product Listing Page, Product Detail Page, or Shopping Cart for future purchase.
		2	Selected product is added to the Save for Later list.			
		3	Product is linked to the customer's account.			
		4	A success message is displayed after saving.			
		5	Saved product is available in future sessions.			
US-002 – Prevent Duplicate Product Saves	<i>As a customer, I want the system to prevent duplicate saved products so that my Save for Later list remains organized.</i>	1	System checks whether the product already exists in the Save for Later list.	HIGH	3 SP	Prevents duplicate products from being added to the customer's Save for Later list to maintain data integrity and improve user experience.
		2	Duplicate products are not added.			
		3	Existing saved product remains unchanged.			
		4	Customer receives an informative message.			
		5	Save list remains free of duplicate entries.			
US-003 – Save Product Notifications	<i>As a customer, I want to receive confirmation or error messages after saving a product so that I know whether my action was successful.</i>	1	Success notification is displayed after a successful save.	MEDIUM	2 SP	Provides clear system feedback for successful and unsuccessful Save for Later actions to improve customer confidence and usability.
		2	Duplicate save attempts display an informative message.			
		3	Failed save operations display an error message.			
		4	Notifications are easy to understand.			
		5	Notifications disappear automatically after a short duration.			

EPIC 2 - Manage Saved Products

TITLE	USER STORY	ACCEPTANCE CRITERIA		PRIORITY	ESTIMATION	DESCRIPTION
US-004 – View Saved Products	<i>As a customer, I want to view all my saved products in one place so that I can easily review them before making a purchase.</i>	1	Customer can access the Save for Later page.	HIGH	5 SP	Displays all products saved by the customer in a dedicated Save for Later list with updated product information.
		2	All saved products are displayed.			
		3	Product image, name, price, and availability are visible.			
		4	Products are displayed using the latest available information.			
		5	Customer can interact with each saved product.			
US-005 – Remove Saved Product	<i>As a customer, I want to remove products from my Save for Later list so that I can keep my saved products organized.</i>	1	Customer can remove any saved product.	HIGH	3 SP	Allows customers to remove unwanted products from their Save for Later list to maintain an organized shopping experience.
		2	Product is removed immediately after confirmation.			
		3	Save for Later list refreshes automatically.			
		4	Success message is displayed.			
		5	Removed product no longer appears in the list.			
US-006 – Display Product Details	<i>As a customer, I want to view the latest product details so that I can make informed purchasing decisions.</i>	1	Product name is displayed.	MEDIUM	3 SP	Displays updated product information including name, image, price, category, and availability for every saved product.
		2	Product image is displayed.			
		3	Latest price is displayed.			
		4	Product availability is displayed.			
		5	Product information reflects current catalog data.			

EPIC 3 - Move Product to Cart

TITLE	USER STORY	ACCEPTANCE CRITERIA		PRIORITY	ESTIMATION	DESCRIPTION
US-007 – Move Product to Cart	<i>As a customer, I want to move saved products directly to my shopping cart so that I can complete my purchase more quickly.</i>	1	Customer can click the Move to Cart button.	HIGH	5 SP	Allows customers to transfer products from the Save for Later list directly to the shopping cart with a single action.
		2	Product is added to the shopping cart.			
		3	Product is removed from Save for Later.			
		4	Cart count updates immediately.			
		5	Success notification is displayed.			
US-008 – Validate Product Availability	<i>As a customer, I want the system to validate product availability before adding it to my cart so that I do not attempt to purchase unavailable products.</i>	1	System checks inventory before adding the product.	HIGH	5 SP	Validates product availability before transferring a saved product to the shopping cart.
		2	Available products are added successfully.			
		3	Out-of-stock products cannot be added.			
		4	Customer receives an informative message if the product is unavailable.			
		5	Cart remains unchanged when validation fails.			

EPIC 4 - Session Management

TITLE	USER STORY	ACCEPTANCE CRITERIA		PRIORITY	ESTIMATION	DESCRIPTION
US-009 – Session Persistence	<i>As a customer, I want my saved products to remain available after logging out so that I can continue shopping in future sessions.</i>	1	Saved products remain associated with the customer account.	HIGH	8 SP	Ensures saved products persist across customer sessions by storing them securely against the customer's account.
		2	Products are retained after logout.			
		3	Saved products are displayed after the next login.			
		4	No saved products are lost between sessions.			
		5	Customer experiences consistent access across sessions.			
US-010 – Synchronize Saved Products	<i>As a customer, I want my Save for Later list to synchronize across devices so that I have a consistent shopping experience.</i>	1	Saved products synchronize after login.	MEDIUM	5 SP	Synchronizes the Save for Later list across multiple devices and customer sessions.
		2	Latest saved list is displayed.			
		3	Changes made on one device are reflected on another.			
		4	Synchronization completes successfully.			
		5	Customer always views the latest saved list.			

EPIC 5 - Empty State & Navigation

TITLE	USER STORY	ACCEPTANCE CRITERIA		PRIORITY	ESTIMATION	DESCRIPTION
US-011 – Empty Save List	<i>As a customer, I want to see a helpful message when my Save for Later list is empty so that I understand why no products are displayed.</i>	1	Empty State screen is displayed when no saved products exist.	LOW	2 SP	Displays an informative Empty State screen when the customer has no saved products.
		2	Customer is informed that the list is empty.			
		3	Screen contains a Browse Products button.			
		4	Layout is clear and user-friendly.			
		5	Empty State follows the application's design standards.			
US-012 – Continue Shopping	<i>As a customer, I want a Browse Products button on the Empty State screen so that I can continue shopping easily.</i>	1	Browse Products button is visible.	MEDIUM	2 SP	Provides a clear navigation option from the Empty State screen back to the product catalog, encouraging customers to continue shopping.
		2	Button redirects the customer to the Home page.			
		3	Redirection occurs without errors.			
		4	Customer can immediately continue browsing.			
		5	Navigation is completed successfully.
